📘 /tutsplus

In the next lesson you will learn:

→ Folder structure

→ HTML syntax

→ Basic usage and browser preview

→ How to use vertical slides

Take Your Presentations to the Next Level with Reveal JS

✓ The simple installation

→ Basic usage

3 Installing Reveal JS on a local web server
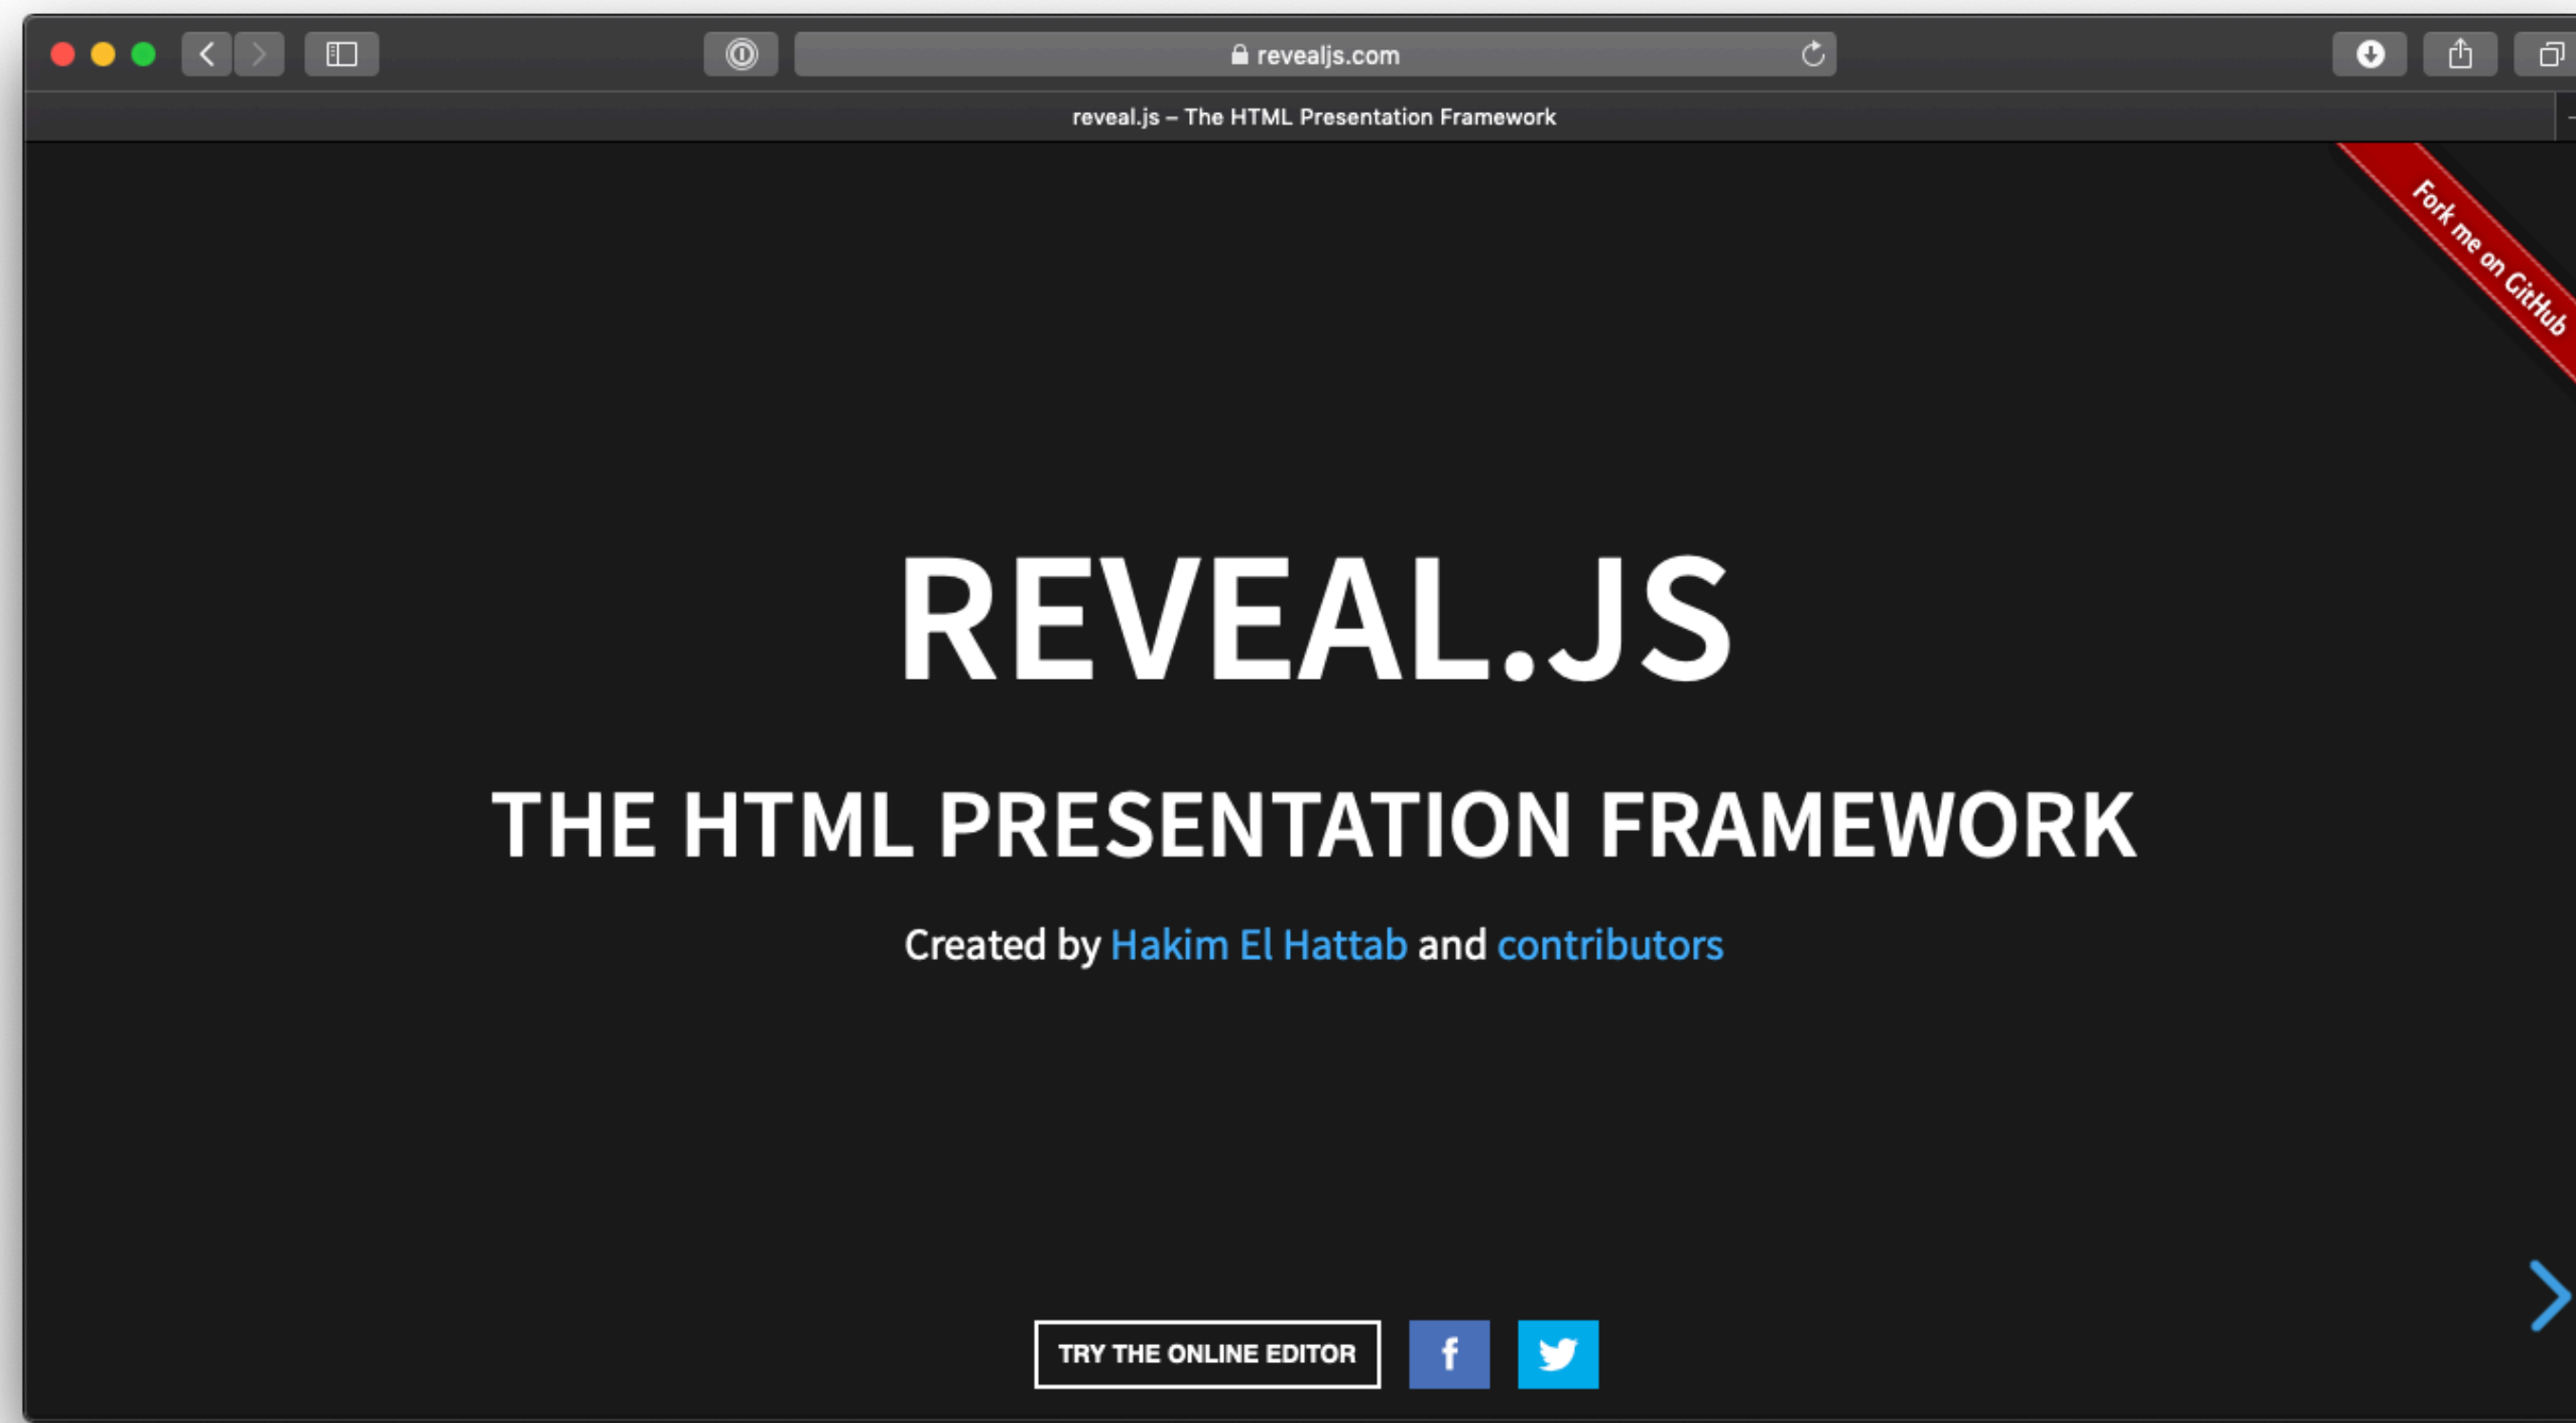

4 Using Markdown to create slides

5 Configuring your presentation

Markdown support

Write content using inline or external Markdown. Instructions
and more info available in the readme.

```
1   /**
2    * A simple theme for reveal.js presentations, similar
3    * to the default theme. The accent color is darkblue.
4    *
5    * This theme is Copyright (C) 2012 Owen Versteeg, https://github.com/StereotypicalApps. It is MIT
     licensed.
6    * reveal.js is Copyright (C) 2011-2012 Hakim El Hattab, http://hakim.se
7    */
8
9
10  // Default mixins and settings -----------------
11  @import "../template/mixins";
12  @import "../template/settings";
13  // -------------------------------------------
14
15
16
17  // Include theme-specific fonts
18  @import url(https://fonts.googleapis.com/css?family=News+Cycle:400,700);
19  @import url(https://fonts.googleapis.com/css?family=Lato:400,700,400italic,700italic);
```

Slides.com

→ Has a visual editor but it's not free

→ Is easier to use

Reveal JS

→ Made for developers

→ Is free

→ Is more flexible

Take Your Presentations to the Next Level with Reveal JS

HTML syntax

→   Uses the <section> tag for each slide

→   You can set options via data attributes

→   Sections can be nested to create vertical slides

Take Your Presentations to the Next Level with Reveal JS
